OFFICIAL VIDEO SCRIPT & WALKTHROUGH CUE SHEET

NxtWave Growth Challenge — 3-Minute Video Pitch

Tailored for: `From-0-Shortlists-to-a-Top-1percent-Candidate.pptx` & Live Working Asset

180 SECONDS
Strict 3-Minute Cap

Timestamp	Visual on Screen	PPT Slide Reference	Core Spoken Focus
0:00 - 0:30	Facecam + Slide 1	**Slide 1:** From 0 Shortlists to Top 1%	Hiring freeze context, ₹2,000 budget constraint, workshop positioning
0:30 - 1:05	Facecam + Slide 2	**Slide 2:** Budget Allocation	SPCs (₹1,200), Viral Gate (₹500), Telegram Groups (₹300) = ₹3.77 CAC
1:05 - 1:40	Facecam + Slide 3	**Slide 3:** The 7-Day Engine	D-7 to D-1 timeline, turning 5,000 impressions into 530 registrations
1:40 - 2:20	Slide 4 / Live Screen Share	**Slide 4:** The Working Asset	Role & Salary Matcher, Probability Estimator, Admit Pass, Viral Gate
2:20 - 2:45	Facecam + Slide 5	**Slide 5:** Attendance & Rejections	Push >65% attendance via 3 WhatsApp touches + 3 deliberate AI rejections
2:45 - 3:00	Full Facecam	**Conclusion**	Bias to Ship, extreme Ownership, and readiness for NxtWave Growth role

Part 1: The Context & The ₹2,000 Reality Check (Slide 1) `0:00 – 0:30 (30s)`

Visual: Slide 1 ("From 0 Shortlists to a Top 1% Candidate") on screen. Webcam circle in bottom-right corner.

"Hi everyone, I'm excited to present my 7-day growth strategy to bring **over 500 engineering students** into NxtWave's live workshop on a strict **₹2,000 budget**.

In 2026, engineering students in Tier-2 and Tier-3 colleges are facing a brutal IT placement freeze. Mass recruiters cut fresher intake in half, and automated ATS filters discard resumes lacking practical GenAI keywords.

With only ₹2,000, paid ads are a non-starter—at ₹40 per click, that budget evaporates in 50 clicks. Instead, we positioned the workshop around an urgent, high-stakes promise: *'Deploy a live industry AI project on your resume in 60 minutes, with interview preparation for ₹8L to ₹24L roles.'* Here is how we acquire 530 students profitably."

Part 2: Budget Allocation — Peer Networks Over Paid Ads (Slide 2) `0:30 – 1:05 (35s)`

Visual: Switch to Slide 2 ("Put the ₹2,000 behind peer networks, not paid ads"). Point cursor to the 3 channels and the ₹3.77 CAC.

"Slide 2 outlines our budget allocation. We put 100% of the ₹2,000 directly behind peer networks rather than ad platforms:

1. **Student Placement Coordinators (`₹1,200`):** We recruit 8 active college placement reps across target campuses, offering a ₹150 UPI bounty once 35 batchmates register through their link. An official placement group broadcast carries a 98% open rate, driving **280 verified registrations**.

2. **Placement Survival Kit Referral Gate (`₹500`):** Students unlock our curated *Top 100 Technical AI Interview Q&As* and *2026 Off-Campus Drive Tracker* by inviting 3 classmates on WhatsApp, driving **160 viral registrations**.

3. **Off-Campus Tech Communities (`₹300`):** Partnering with 6 regional Telegram channels sharing fresher salary benchmarks for **90 registrations**.

That delivers **530 registrations at a blended CAC of just ₹3.77**."

Part 3: The 7-Day Engine — Compounding Candidates (Slide 3) `1:05 – 1:40 (35s)`

Visual: Switch to Slide 3 ("Seven days turn 5,000 impressions into 530 candidates"). Point cursor across the D-7 to D-1 timeline.

"Slide 3 shows the 7-day operational engine that turns 5,000 impressions into 530 confirmed candidates:

• **Days 7 to 6:** We onboard 8 placement reps, seed the interactive asset, and secure an initial base of 120 registrations.
• **Days 5 to 3:** We activate the referral loop, launch regional Telegram drops, and trigger a scarcity broadcast—*'110 seats remaining'*—pushing the total to 425.
• **Days 2 to 1:** We run a ₹500 voucher leaderboard for top referrers, issue digital admit passes, and close at 530+ confirmed students.

Organic peer referrals multiply our 370 direct signups into **530 candidates**, setting up 360 live attendees."

Part 4: The Working Asset — Make the Asset Do the Selling (Slide 4 / Live Demo) `1:40 – 2:20 (40s)`

Visual: Show Slide 4, then switch tab to live working asset (akash-7360.github.io/NxtWave/). Click role dropdown and probability sliders.

"Slide 4 highlights the core differentiator: our interactive working asset. Instead of a boring, static Google Form, I built a 5-part web application that delivers immediate value before asking for registration:

1. **Role & Salary Matcher:** Students select target roles from ₹8L to ₹24L LPA and instantly see tailored AI architectures and ATS resume bullet points.
2. **Shortlist Probability Estimator:** An interactive gauge showing how a live AI capstone jumps ATS callback chances from 18% to 98%.
3. **Digital Admit Pass:** Generates a personalized candidate pass with seat number, QR code, and 1-tap Google Calendar sync.
4. **Referral Gate:** Tracks peer invites in real-time (1/3 → 2/3 → 3/3) to unlock the interview kit.
5. **Light & Dark Theme:** Built with custom CSS tokens to ensure 100% legibility on any mobile or desktop screen."

Part 5: Attendance System & Deliberate AI Rejections (Slide 5) `2:20 – 2:45 (25s)`

Visual: Switch to Slide 5 ("Attendance is engineered, not assumed"). Highlight 3 touches and Deliberate Rejections.

"Registrations mean nothing without show-ups. On Slide 5, we engineer live attendance past **>65%** through 3 WhatsApp touchpoints: immediate calendar sync, a 30-second D-1 API-key micro-task that creates psychological commitment, and a T-minus 45 minutes doors-open alert.

Crucially, when AI suggested spending ₹1,500 on meta ads, cold-emailing HODs, or calling the workshop 'Prompt Engineering Basics', **I deliberately rejected all three**. Ads would yield only 25 leads, HOD approval takes weeks, and tech freshers want hands-on engineering, not prompt basics."

Part 6: Bias to Ship & Ready for NxtWave (Conclusion) `2:45 – 3:00 (15s)`

Visual: Full-screen webcam, high energy, confident eye contact.

"In under 48 hours, I didn't just design a presentation—I mathematically modeled unit economics, built a functional product, and architected an end-to-end acquisition engine.

This reflects my **Bias to Ship, extreme Ownership, and analytical rigor**. I'm eager to bring this exact drive to the Growth team at NxtWave. Thank you!"

Recording Checklist:

- **Live Demo Link:** `https://akash-7360.github.io/NxtWave/`
- **Slide Deck:** `From-0-Shortlists-to-a-Top-1percent-Candidate.pptx`
- **Target Time:** 2 minutes 50 seconds to 2 minutes 58 seconds.
